

	<p>List your ideas about design, art and the design process.</p>
<p><b>DESIGN PROCESS</b></p> <p>The spiral diagram shown here represents one way to look at the design process. Design thinking doesn't follow a straight linear path. The phases of the process often overlap, occurring simultaneously and circling back on themselves.</p> <p><small>Spiral model, adapted from Barry Boehm, 1996, and Karl Ulrich, 2012</small></p>	<p>Why do you think the design process does not follow 1 path from beginning to end?</p>
	<p>Which part of the design process do you feel is the most important and why?</p>
	<p><b>PROTOTYPE TO PRODUCT</b>          What are the characteristics of this display?          Think about .... Colour, Line, Form, Placement of items, Materials used.</p>
	<p>Why do designers ask questions? Why do designers want to improve designs?</p>
	<p><b>Design it Better!</b>          Why is feedback important?</p> <p>Do you know any tips about giving or receiving feedback?</p>
